RESPONSE TO APPLICANT'S AMENDMENT

1. Applicant's amendments filed on 11/15/10 is acknowledged.

Claims 146 and 148-151 and 159-162 are pending.

*Claims 146 and 148-151 and 159-162 read on an isolated mammalian Hox11(+), CD45(-) cell are under consideration in the instant application.*

2. Applicant's amendments filed on 11/15/10, have obviated the previous rejection of claims 146 and 148-151, 158-160 under 35 U.S.C. 102(b) as being anticipated by US Patent Application 2002/0187548 (IDS) and under 35 U.S.C. 102(a) as being anticipated by Kodama et al ( Science, 2003, v.302, pages 1223-1227) or Ferrando et al., ( Blood, 2002, v.100, n.11, page 154A).

The following new ground of rejection is necessitated by amendments filed 11/15/10.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

*(e2) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 37(c) of this title before the invention thereof by the applicant for patent.*

4. Claims 146 and 148-151 and 159-162 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 7,015,037 or US Patent 7,510,877 as is evidenced by the instant specification ( see paragraph 0088 and 0115).

Art Unit: 1644

US Patent '037 teaches an isolated mammalian cells that are endogenously expressing HOX 11 and lack expression of CD45 and CD34 ( see entire document, column 5, 7 and Table 2 in particular).

US Patent 877 teaches an isolated mammalian cells that are adult spleen cells. ( see entire document, Claim 13 in particular).

As is evidenced from the instant specification, said cells are inherently endogenously expressing HOX 11 and CD45 negative ( see paragraph 88 and 0115 in particular )

Claims 148-150 and 161 are included because said structural properties would be an inherent properties of the recited cells expressing Hox 11. Since the office does not have a laboratory to test the reference isolated cells it is applicant's burden to show that the reference cells do not have the same structural properties as recited in the claims. See *In re Best*, 195 USPQ 430, 433 (CCPA 1977); *In re Marosi*, 218 USPQ 289, 292-293 (Fed. Cir. 1983); *In re Fitzgerald et al.*, 205 USPQ 594 (CCPA 1980).

Claims 159 and 160 are included because the instant claims recited a product (an isolated Hox 11 expressing cells) and the patentability of the product does not depend on its method of production or source. In *re Thrope*, 227 USPQ 964,966 (Fed. Cir. 1985). See MPEP 2113.

The reference teaching anticipates the claimed invention.

5. No claim is allowed.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
